

OFFICIAL BRAND GUIDELINES

Taskiz Brand Guide

Strategy, voice, visual system, and usage rules — built from the Taskiz GTM master plan and the live site at taskiz.ai.

PREPARED FOR
Taskiz.ai

BASED ON
GTM Master Plan · Live Website · Brand OS

VERSION
1.0 · Aug 2026

Master one-liner: Run your contracting business from your phone.

BRAND SYSTEM

Contents

Use this guide for website, product UI, social, ads, sales, and partner materials.

01 Brand essence
Who Taskiz is and the single story we tell

02 Positioning & messaging
Category, promises, heroes, value props

03 Voice & language rules
Tone, words to use, words to avoid

04 Audience (ICP)
Who we speak to first — and who later

05 Color system
Core palette from Brand OS + website

06 Typography
Outfit, Inter, Fragment Mono

07 Logo system
Mark, wordmark, clear space, misuse

08 Photography & motion
Field-first visual language

09 Website alignment
How taskiz.ai maps to strategy

10 Application checklist
Quick QA before you ship creative

HOW TO USE THIS GUIDE

When strategy and the live website diverge, default to GTM product truth for claims, and Brand OS colors/type for design. Do not market features that are hidden, dormant, or not findable by a first-time user.

BRAND SYSTEM

Brand essence

Taskiz is not generic AI software. It is a practical business tool for contractors in the field.

Run your contracting business from your phone.

Master promise · GTM Master Plan + Brand OS

● CATEGORY

**Mobile business app
for contractors**

● ROLE OF AI

**Supporting Copilot —
not the category**

● FEELING

**Practical, field-first,
honest — not fluffy SaaS**

WHAT TASKIZ IS

Taskiz helps solo contractors and small service businesses manage customers, jobs, schedules, estimates, and invoices in one simple mobile app — with AI to help get admin work done faster by talking or typing.

WHAT TASKIZ IS NOT

- Not an AI phone receptionist or “never miss a call” product (until that is live and visible).
- Not a full field-service platform competing feature-for-feature with Jobber or Housecall Pro.
- Not desk-only CRM for enterprise ops teams.
- Not a vague “AI employee” that replaces human judgment on the job.

STRATEGIC DECISION (GTM)

Go to market as a simple mobile business app for contractors. Voice and AI remain highly visible on taskiz.ai, but they support the main promise — they do not redefine the product as a phone agent until those workflows are fully activated.

BRAND SYSTEM

Positioning & messaging

Locked launch language from the GTM master plan. Use these before inventing new claims.

PRIMARY PROMISE

Run the business side of your contracting business from your phone.

SUPPORTING PROMISE

One simple app for customers, jobs, schedules, estimates, and invoices.

HOMEPAGE HEROES

PRIMARY (GTM)

Run your contracting business from your phone.

LIVE SITE ANGLE

The Voice Assistant Built for Contractors

CAMPAIGN ANGLE

Stop running your contracting business from five different apps.

FIELD ANGLE

Built for contractors who work from the field, not behind a desk.

SUBHEAD BANK

- Taskiz helps contractors manage customers, jobs, schedules, estimates, and invoices in one simple mobile app, with AI to help you get work done faster.
- Talk. Work. Taskiz handles the rest. (site)
- Your hands-free back office — less time managing the business, more time making money.

VALUE PROPS

Everything in one place

Customers, jobs, tasks, schedules, estimates, invoices — not five apps.

Built for the field

Between jobs, on-site, or in the truck — not behind a desk.

AI that helps real work

Talk or type to create invoices, estimates, events, and actions faster.

Get paid faster

Professional invoices and PDFs without waiting until night.

Easy setup

Conversational onboarding for business details, rates, Calendar, QuickBooks.

Look professional

Clean estimates and invoices without heavy software training.

BRAND SYSTEM

Voice & language rules

Sound like a sharp contractor’s business partner — not a Silicon Valley hype deck.

Practical

Talk benefits and workflows, not buzzwords.

Field-first

Write for the truck, job site, and driveway.

Honest

Only promise what a first-time user can find today.

Confident

Clear and direct — no fluff, no fake urgency.

APPROVED CTAS

SAY THIS / NOT THAT

USE	AVOID (FOR NOW)
AI Copilot for contractor admin	AI phone receptionist
Stay organized and move jobs forward from your phone	Never miss another call
Manage customers, jobs, schedules, estimates, and invoices	Texts and email in one inbox
Spend less time on admin	Replace your office assistant
Simple mobile business app for solo contractors	Full field service management platform
Voice-powered help to log jobs, schedule, and invoice	Autonomous AI employee

LAUNCH RULE

If a first-time user cannot easily find it and use it today, it should not be part of the public launch message, ads, app store copy, or sales scripts.

BRAND SYSTEM

Audience (ICP)

Narrow beachhead first. Expand only after activation is proven.

PRIMARY BEACHHEAD

Solo handyman businesses · Small general contractors

Owner-operators and very small crews who work from the field, send estimates and invoices regularly, juggle texts / Calendar / QuickBooks / notes, and don't have a full-time office manager.

ICP CHARACTERISTICS

- Works from the field most days
- Sends estimates & invoices regularly
- Uses Google Calendar, Gmail, texts, QuickBooks, notes, phone contacts
- Wants to look more professional without learning heavy software
- Feels disorganized but isn't ready for expensive field-service suites
- No full-time office manager

EXPANSION ORDER

Now

Handyman · Small GC · Painters · Remodelers

Next

Landscapers · Cleaning (with care)

Later

Electricians · Plumbers · HVAC
(more competitive)

JOBS TO BE DONE

Capture the job

Log details the moment they come in — no scraps of paper.

Quote while hot

Same-day estimates before the lead cools.

Get paid

Invoice finished work without rebuilding line items at midnight.

Stay organized

One place for customers, schedule, and history.

BRAND SYSTEM

Color system

Canonical palette from Brand OS (aligned to taskiz.ai purple / lilac system).

			
Brand #9563FF	Brand Deep #663CF6	Accent #ED81FF	Accent Soft #D1D0FC
			
Surface Lilac #F6F3FE	Dark #141233	Ink #000000	Ink Soft #262424
			
Muted #5E5F5C	Surface #F7F7F7	Warm #E88146	Link #0099FF

USAGE RULES

- Primary CTA buttons: Brand Deep (#663CF6) on white, or white text on Brand Deep.
- Hero sections: Dark (#141233) with Brand / Accent gradient accents — matches site energy.
- Body text: Ink / Ink Soft on white or Surface; never light gray on lilac (contrast).
- Do not introduce new primary hues (teal, neon green, pure red) for core product marketing.
- Warm orange is reserved for caution / do-not-say callouts — not brand celebration.
- Maintain WCAG-minded contrast for text over photos (use scrims / dark gradients).

SIGNATURE GRADIENT

Brand Deep → Brand → Accent · Use sparingly on heroes, covers, and end cards.

BRAND SYSTEM

Typography

Website stack: Outfit (display) · Inter (UI/body) · Fragment Mono (labels/meta).

OUTFIT BOLD · DISPLAY / HEROES / H1

Run your business from your phone.

OUTFIT SEMIBOLD · SECTION TITLES / H2-H3

Talk. Work. Taskiz handles the rest.

BODY · PARAGRAPHS / UI

Taskiz helps contractors manage customers, jobs, schedules, estimates, and invoices in one simple mobile app.

TYPE ROLES

H1 / Hero	Outfit Bold 32–48 · tight tracking · dark or white
H2	Outfit SemiBold 20–28
H3 / Card titles	Outfit SemiBold 14–18
Body	Inter / Outfit Regular 14–16 · line-height ~1.5
UI labels / meta	Fragment Mono or Outfit 11–12 · uppercase sparingly
Captions	Muted 12 · never the only contrast for critical info

WRITING RHYTHM

Short sentences. Concrete nouns (jobs, invoices, truck, driveway). Prefer “you” and “your business.” Avoid corporate abstractions (“synergize workflows,” “leverage AI”). One idea per line on mobile heroes.

BRAND SYSTEM

Logo system

Primary mark + wordmark from Brand/Brand Logo. Keep it simple and consistent.

PRIMARY — light backgrounds

REVERSE — dark backgrounds

CLEAR SPACE & SIZING

Keep clear space around the logo at least the height of the mark's petal unit on all sides. Minimum digital size: wordmark ≥ 96 px wide; app icon ≥ 32 px. Never place on busy photos without a solid scrim or blur panel.

DO NOT

- ✗ Don't stretch, rotate, or recolor outside the brand palette.
- ✗ Don't add drop shadows, outlines, or 3D bevels to the mark.
- ✗ Don't place dark logo on dark purple without inversion.
- ✗ Don't pair with competing trade logos in a single equal lockup without approval.
- ✗ Don't recreate the wordmark in another typeface.
- ✗ Don't animate the logo in a way that breaks petal geometry.

FILE LOCATIONS

Brand/Brand Logo/Logo.svg · clients/taskiz/assets/ · public/assets/taskiz-logo.svg

Prefer SVG for web; PNG/PDF exports for print and social templates.

BRAND SYSTEM

Photography & motion

Documentary-commercial. Real job sites. Phone as a tool — never fake UI text.

Job site / residential

Truck / van life

Owner-operator focus

VISUAL PRINCIPLES

Authentic people

Owner-operators ~30s–50s; real residential sites, driveways, van interiors.

Natural light

Daylight or golden hour; soft realistic shadows — not studio glam.

One hero moment

One person or one clear action. No collage, multi-panel, or magazine covers.

Text space

Leave clean lower-third or side negative space for titles / CTAs.

Phone as tool

Phone may appear; screen blank/blurred/unreadable — never fake Taskiz UI gibberish.

No clichés

No hard-hat stock posing, sci-fi holograms, robots, neon cyberpunk, call-center headsets.

DO

- Rule of thirds · shallow DOF
- Premium but practical framing
- Hands, tools, real materials
- Scrim text over footage

DON'T

- Readable logos on vans/tools
- Stock fake smiles to camera
- Busy collage / billboards
- Burned-in AI watermarks

MOTION (REELS / PRODUCT)

Subtle commercial motion beats chaotic camera. Stories: hook → tension → resolve. Graphics (titles, CTAs, captions) sit on top of footage as design — never rely on AI video to invent brand type.

BRAND SYSTEM

Website alignment

How the live site (taskiz.ai) and GTM strategy work together.

LIVE SITE MESSAGING (CURRENT)

- Hero theme: The Voice Assistant Built for Contractors
- Promise cues: Talk. Work. Taskiz handles the rest. / Hands-free back office
- Capabilities: Capture jobs · Schedule · Invoices · Keep organized
- Proof chips: Bank-level security · No hidden fees · Cancel anytime
- Primary CTA pattern: Get Started → app.taskiz.ai/sign-in
- Beta path: Web first; iOS TestFlight & Android private builds

RECONCILE SITE + GTM

Dimension	taskiz.ai expression	GTM / Brand OS lock
Category feel	Voice-powered work assistant	Mobile business app for contractor
Hero emphasis	Voice / hands-free admin	Run business from your phone
AI role	Front-and-center assistant	Supporting Copilot, not the category
CTA	Get Started	Join the Beta · Start Free · See H

GUIDANCE FOR CREATIVE & WEB UPDATES

Keep the site’s energetic voice creative, but ensure product claims stay within live capabilities. Prefer GTM heroes when running performance ads and sales decks. On the site, pair voice messaging with concrete workflows (customers → estimate → job → invoice) so visitors understand the full business app.

BRAND SYSTEM

Application checklist

Ship creative that is on-message, on-ICP, and brand-safe.

MESSAGE	VISUAL	FORMAT	OPS
☐ Passes do-not-say list ☐ Primary beachhead ICP first ☐ CTA from approved list ☐ Claims match live product truth	☐ Brand purple/lilac palette only ☐ Logo clear space & contrast OK ☐ Typography stack respected ☐ Photo is field-authentic	☐ Correct aspect (1:1 / 9:16 / web) ☐ Safe margins for platform UI ☐ Text legible over image/video ☐ End card / CTA readable in 1s	☐ Client workspace: Taskiz Brand OS ☐ Publish profile ready if posting ☐ Filename / version noted ☐ Human approve before go-live

CONTENT PILLARS (ALWAYS-ON)

PAIN Scattered tools, late invoices, lost notes	DEMO Customer → estimate → job → invoice	BEFORE / AFTER Chaos vs organized with Taskiz	EDUCATION What solo contractors should track	TRUST Field-first beta, owner-operator fit
---	--	---	--	--

ONE-SENTENCE BRAND TRUTH

Drop in contractor GTM truth → Taskiz speaks as a simple, voice-capable mobile business app that helps owner-operators run customers, jobs, schedules, estimates, and invoices from the phone — approved by humans, published with confidence.
